and

A Welcome Message

Above: October Vaccination Campaign in Bisate

Welcome to the December 2009 issue of the Musanze District Health Newsletter. Over the past few months, important initiatives have occurred throughout the district to facilitate positive behavior change, address chronic illnesses and improve the overall health of Musanze's citizens.

The first week of October marked the launching of a national vaccination campaign that targeted babies, children and pregnant women. Sur Eau, de-worming and prenatal pills and Vitamin A were distributed in addition to life-saving vaccines. The district's health centers reported that 55,231 children under the age of 5 and 13,893 women were reached.

This month's newsletter features pictures and profiles of all of Musanze's health centers, including the district's newest health center in Gashaki. Once Gashaki is fully equipped, community members who are currently traveling 5-7 km to seek services in Murandi Health Center will have access to a full range of consistent, quality medical services.

The District sincerely thanks and congratulates all health sector employees for their hard work, coordination and willingness to work with partner organizations and their continued efforts to build a healthier Musanze.

For more information on these and other health issues, please tune into Musanze's monthly radio broadcast and visit our Website at: <http://musanze.gov.rw>.
